PROFESSIONAL SUMMARY

Experienced Software Developer with over 2 years of expertise in building and maintaining dynamic, user-focused web applications and software solutions. Proficient in modern frontend technologies including **React**, **TypeScript**, **React Query**, **Chakra UI**, **React Hook Form**, **Ant Design**, **ShadCN**, **Tailwind CSS**, and **Redux**. Skilled in implementing responsive design principles, optimizing performance, and enhancing user experience across devices.

Proven ability to collaborate with cross-functional teams, seamlessly integrate user interfaces with backend systems, and ensure high-quality, scalable code through thorough testing and debugging. Experienced in leading frontend teams, adopting Agile methodologies, and delivering innovative solutions that improve product quality and user satisfaction.

Seeking opportunities to drive impactful projects, leveraging my skills in Agile development, product management, and quality assurance to contribute to organizational growth and success.

- Jira
- React
- TypeScript
- Nextjs
- PHP
- Python
- TailwindCSS/Bootstrap
- GraphQL/Rest API
- Git
- GitHub/BitBucket
- Slack
- Trello/Clickup

RECENT PROJECTS

- Pushbio web application
- MS Bullion Admin software for accounting
- MS Gold Customer and Admin web applications

ACCOMPLISHMENTS

Agile Development & Collaboration

- Collaborated within a cross-functional Agile team, engaging with business stakeholders to design and implement solutions that enhanced system performance by 25%.

Product Innovation & Growth

- Spearheaded product development initiatives for a software company, driving a 100% increase in customer satisfaction and contributing to a 45% boost in revenue.

Process Automation & Efficiency

- Developed private libraries to automate repetitive tasks, reducing development time by 30% and streamlining workflow processes.

Innovative Solution Delivery

- Designed and delivered a state-of-the-art account management solution integrating multiple applications, enhancing operational efficiency by 75%.

User-Centered Frontend Development

- Led the frontend development of client-facing and admin applications with a focus on user experience, achieving an 80% increase in user satisfaction and engagement.

Critical Issue Resolution

- Identified and resolved high-impact technical issues, reducing system downtime and improving platform stability, resulting in a 69% rise in customer satisfaction.

WORK HISTORY

Software Developer

Pushbio (UK) Limited

August 2024 – Present

Pushbio.io: An all-in-one content management platform for creators, offering tools for course creation, payments, website management, and more—all in one seamless experience.

Responsibilities & Contributions:

- Collaborated with the development team to deliver features using the latest technologies, ensuring functionality and performance.
- Implemented responsive design principles for seamless experiences across devices.
- Adopted Agile methodologies to drive iterative development and continuous improvement.
- Actively participated in review and retrospective meetings to maintain transparency and resolve challenges.
- Partnered with the product design team to optimize user interface and enhance user experience.
- Developed an onboarding system to streamline new user setup, ensuring quick adoption of essential tools.
- Implemented a collaboration feature, enabling creators to work together seamlessly.

Key Achievements:

- Delivered all features within budget and on schedule, meeting project objectives and stakeholder expectations.
 - Boosted user satisfaction and retention by introducing intuitive features and real-time updates, earning positive feedback.
-

Software Developer

Async Techs Limited

April 2024 – October 2024

MS Bullion Admin: Business accounting software for performance analytics, inventory management, and generating accounting reports.

Responsibilities & Contributions:

- Led project development, overseeing product design, backend, frontend, and QA teams using Agile methodologies.
- Conducted standups and code reviews to maintain consistent coding practices and clear communication of updates.
- Designed and implemented the reporting and analytics system, providing key business insights.
- Provided ongoing support and maintenance, addressing client feedback and driving continuous improvement.
- Validated system reliability through extensive testing and real-world simulations.

Key Achievements:

- Delivered the MVP on time and within budget.
- Improved QA team efficiency by 45% through streamlined processes.

MS Gold: E-commerce platform for luxury jewelry, with an admin system for inventory and access management.

Responsibilities & Contributions:

- Enhanced SEO using Next.js App Router, improving search engine visibility.
- Migrated the codebase from Next.js Pages Router to App Router, aligning with modern best practices.
- Conducted QA tasks to ensure all features functioned as intended.

Key Achievements:

- Successfully migrated the project to a modern Next.js framework.
 - Improved search engine rankings, driving higher traffic and visibility for MS Gold.
-

Frontend Developer

Remote Freelancer

January 2022 – February 2024
